ABEN An anhydrous cosmetic composition comprising, by weight of the total composition, 1-50 % of a polar, emulsifying siloxane elastomer, 0.01-40 % particulate material; and 1-70 % of nonpolar oil; an anhydrous cosmetic composition comprising an emulsifying siloxane elastomer and an incompatible nonaqueous polar ingredient, wherein the emulsifying siloxane elastomer is present in an amount sufficient to render the incompatible nonaqueous polar ingredient compatible in the anhydrous cosmetic composition; and a method for preparing stable, anhydrous cosmetic compositions comprising at least one incompatible nonaqueous polar ingredient, comprising adding to the anhydrous composition an emulsifying siloxane elastomer in an amount sufficient to cause the incompatible nonaqueous polar ingredient to become compatible in the anhydrous cosmetic composition.

ABFR L'invention concerne une composition cosmetique anhydre contenant, en poids de la totalite de la composition, 1 a 50 % d'un elastomere de siloxane emulsifiant polaire, 0,01 a 40 % d'une matiere particulaire et 1 a 70 % d'une huile non polaire, ainsi qu'une composition cosmetique anhydre contenant un elastomere de siloxane emulsifiant et un ingredient polaire non aqueux incompatible, dans laquelle la quantite d'elastomere de siloxane emulsifiant present est suffisante a rendre compatible ledit ingredient polaire incompatible dans la composition cosmetique anhydre. L'invention concerne egalement un procede de preparation de compositions cosmetiques anhydres stables contenant au moins un ingredient polaire non aqueux incompatible, lequel procede consiste a ajouter a la composition anhydre une quantite d'elastomere de siloxane emulsifiant suffisante a rendre ledit ingredient polaire compatible dans la composition cosmetique anhydre.
